Introduction Gross Domestic Product is one of the main factors that goes into determining a country's economic growth. Gross Domestic Product or GDP is a "comprehensive measure of U.S economic activity." (add bea citation) (cite K. Hema Divya) found that exchange rates and market indexes are important factors that influence an economy's GDP. They also found that inflation is highly correlated, but not a significant influencer.

Specific Aims

Data My dependent variable will be Gross Domestic Product (GDP). My independent variables will be Population (Annual Percent), Interest Rate (Annual Percent), 10-Year Treasury Constant Maturity Rate, Disposable Personal Income (Annual Percent), Unemployment Rate (Annual Percent), and All Transactions House Price Index.

The data is collected from the Federal Reserve Economic Data (FRED) website. All of the datasets have been collected separately and compiled into one document.
